Diethylene Glycol Methyl Ethyl Ethe	
Structural formula	
Uses	as organic synthesis solvent and inks, coatings technology fields.
Molecular formula	C ₇ H ₁₆ O ₃
Molecular weight	148.21
CAS	1002-67-1
EINECS RN	213-690-5
Appearance	colorless transparent liquid
Boiling point(101.3kPa)	176°C
Freezing point	
Specific gravity(25°C /4°C)	
Refractive index(25°C)	1.4049
Flash point	82°C
Melting point	
Density	0.9228 g/mL
Surface tension (mN/M) 20°C	27.5
Solubility	Soluble in water, ethanol and other organic solvents
Viscosity(20°C)	
Chemical properties	stable property, not easy to react; , decomposition occurs in the presence of an acidic catalyst at high temperature; with oxygen to form Peroxide.

Purity(GC)%	≥99.5
Moisture%	≤0.1
Acidity(as HAC)%	≤0.015
Peroxide(as H ₂ O ₂)%	≤0.005
Packing	190kg
