

SPECS:

DIETHYLENE GLYCOL MONOBUTYL ETHER (BDG)

CAS: 112-34-5

TECHNICAL INDEX::

ITEMS	BDG
APPEARANCE	COLORLESS TRANSPARENT LIQUID
PURITY WT PCT≥%	99.0
MOISTURE≤%	0.1
SPECIFICGRAVITY(d4 ²⁰)	0.954 ± 0.005
ACIDITY(HAC)	0.01
COLOR (PT-CO) (Pt-Co) ≤	15

Application: BDG is mainly used in PVC stabilizer; widely used in electronic chemical cleanser; used as solvent for paint, printing ink, stamp-pad ink, oil and resin; as metal detergent, paint remover, lubricant remover, detergent for Auto engine, dry cleaning solvent, epoxy resin solvent, medicine extractor; as stabilizer of latex paint, evaporation suppressant of aircraft paint, surface improving agent for baking enamel of high temperature, etc.; as intermediate in plasticizer, diluent for hydraulic brake fluid. It is also used to produce piperonylic butoxy compounds.

Packing: packed in drum,200KGS/drum.

Storage: store in a cool, ventilated, dry place, in accordance with the common chemical transportation
