

JIANGSU DYNAMICCHEMICALCO.,LTD.

ADD: 1-A22-1 BAILONG ROAD, NANJIG CHEMICAL INDUSTRY PARK, CHINA

TEL: (86)25-58391532 FAX: (86)25-58392798

SPECS:

DIETHYLENE GLYCOL MONOETHYL ETHER (DE)

CAS: 111-90-0

TECHNICAL INDEX::

ITEMS	DE	METHOD
APPEARANCE	COLORLESS TRANSPARENT LIQUID	VISUAL
PURITY WT PCT≥%	99.0	G.C
MOISTURE≤%	0.1	GB/T 6283(KF)
DISTALLATION RANGE	194.0-205.0℃	GB/T 7534
ACIDITY(HAC)	0.01	HAC
COLOR (PT-CO) (Pt-Co) ≤	15	GB/T 3143

Application: DE is mainly used as solvent for grease, nitrocellulose, synthetic resin, alcoholate dyestuff and vinylcellulose. In coating industry, it can be used as varnish dryer and coating diluent. In printing and dyeing industry, it can be used as osmosis reagent and leveling agent. It also can be used as additive in fuel industry and dyestuff in textile industry and as organic synthesis intermediate. DE also can be used as solvent of wood dyestuff, petroleum soap, petroleum sulfonic acid. It also can be used as nonpainting coloring reagent and the intermediate of organic compound in organic synthetic industry and analysis chemistry agent.

Packing: packed in drum, 200KGS/drum.

Storage: store in a cool, ventilated, dry place, propylene glycol ether c transport, in accordance with the common chemical transportation
