

Methyl Isobutyl Carbinol

Class: 3

UN No. 2053

Packaging Group: III

Hazchem Code X

Appearance: Colourless with slight characteristic odour.

Active content: 99.5% min

Acidity: 0.01% max

Water: 0.2% max

Physicals: Colorless transparent liquid with characteristic odor is miscible with most ordinary organic solvent. Its solubility is 1.7% in 20°C. Slight water-soluble, gravity 0.813, Chemical properties stability, and high content of active ingredients.

Application: Excellent foaming agent for non-ferrous metal and non-metallic ores. Mainly used as foaming agent for non-ferrous oxide ores or fine-grained sulfide ores containing a large quantity of soil grade. It is widely used in lead-zinc ore, copper-molybdenum, copper-gold ore and mineral processing of copper-gold ore although the world. Having particular effective on improving the quality of concentrate.

Packaging: Iron drum of 160KG. 80 drums per FCL

Storage: To be stored in cool and dry environment

Guarantee Period: 12 Months.
