

Benzoin

HS code: 2914509090

CAS No.:119-53-9

Molecular Structure:

Molecular Name: $C_{14}H_{12}O_2$

Molecular Weight:212.22

Specifications:

Appearance:white to light yellow powder

Assay:99.5% Min

Melting Rang:132-137 Centigrade

Residue:0.1%Max

Lossing on drying:0.5%Max

Package:

25kgs/Draft-paper bags;15Mt/20' fcl with pallet and 17Mt/20' fcl without Pallet.

Usage:

As a photocatalyst in photopolymerization and as a photoinitiator

As a additive used in powder coating to remove the pinhole phenomenon.

As the raw material for synthesis of benzil by organic oxidation with nitric acid or oxone.
